

Never before in Myth, History or Legend has there been, or will ever be a Being like Jesus the Christ.

A Historic Search for the Face of Jesus presents the powerful physical presence of Jesus - as it was and is - in all its magnificence, for Beauty and Love are two of the attributes of God and He exudes them both.

A Historic Search for the Face of Jesus is based on a thorough research of His true likeness, which Dame De Saint-Simone compiled into a book to show to the general public a historic proof of the majestic beauty and the powerful physical presence of Jesus Christ the Son of God.

A Historic Search for the Face of Jesus compares the true historic evidence of His likeness to the unfortunately inaccurate images one sees in most media outlets more often than not, which downgrade His physical appearance to the point of being '*quasi malicious*'. A Historic Search for the Face of Jesus contradicts with true evidence all of these malicious or not mishaps by using the real images of Jesus found in different sources: i.e. a Mural of early Christendom (3rd Century A.D.) of His true image imprints: His image on the Vero-Ikon and the Holy Shroud of Turin, the painting of the Sacred Heart that Sor Faustina, to whom He appeared and that she directed a painter to do, and a real photo of Jesus taken by Sor Anna Ali in one of His apparitions to her - all of them resembling each other and indeed to Jesus Christ. A true historical evidence of how Jesus truly looked and still looks. If you really want know what Jesus looked like, you have in this book true evidence of the Beauty of God made Man. A Historic Search for the Face of Jesus offers the reader a true historical evidence of how Jesus truly looked and still looks.
